THE FUTURE IS UNFOLDING IN DAHON

We believe our folding bicycles are the wave of the future.

Beginning with the legendary 16" wheel Dahon Folder eight years ago, Dahon now markets a dozen models of folding bikes ranging from 16" to 25". The bikes come with components designed for everyday cyclists to professional competitors.

Over 500,000 units of Dahon folding bikes have been sold in 30 countries through bike dealers, as premiums, in RV, PX, and sporting goods and department stores, as well as through upscale mail order catalogs. (Dahon products are not distributed through regular discounters.) Every user bought a Dahon for his/her own reason of portability or niceability—on an RV, boat, plane, public transit, in a trunk or closet.

Dahon has become the world's largest folding bike manufacturer. But it is just the beginning. In response to popular demand, Dahon recently initiated its OEM program making its folding bicycle technology available to manufacturers and marketers internationally.

Dahon has developed dealer sales materials which include compelling brochures, educational videotapes, strong consumer advertising campaign for print and broadcast— all available to our dealers at nominal costs.

Just as Dahon listens to consumers, we encourage you—dealers and their friends—to communicate any ideas you may have that can help us reach our goal of supplying you with the best bicycle value in the world.
